

Why Choose Sangoma Carrier Voice

Voice is no longer just about minutes, routes, and rate decks. For MSPs, ITSPs, UCaaS providers, contact centers, and application platforms, it's the foundation behind the services they sell and the revenue they grow.

The Reality of Today's Voice Market

- > Price compression is accelerating
- > Voice is increasingly commoditized
- > Providers are stuck competing on pennies

If all you sell is voice, you compete on price. If you partner with Sangoma Carrier Voice, you compete on value.

More Than Carrier Services. A Complete Communications Stack.

Sangoma Carrier Voice is backed by a broader portfolio that helps you win larger deals and deliver more value.

- > UCaaS, CCaaS
- > Phones, hardware and SBCs
- > Managed services, voice, messaging, and APIs

Stop selling dial tone.

Start building a communications business.

Sangoma Carrier Voice is not just a SIP provider.

It is the infrastructure layer that helps you build, operate, protect, and grow modern communications services.

Why Providers Choose Sangoma Carrier Voice

Turn Voice into a Revenue Engine:

- > SMS & MMS services
- > Programmable voice and messaging APIs
- > Hosted billing, taxation, and invoicing
- > Monetization across inbound and outbound traffic

Eliminate Risk and Compliance Burden:

- > STIR/SHAKEN call signing
- > 10DLC campaign registration
- > E911 support for Kari's Law and Ray Baum's Act
- > Fraud detection, alerting, and mitigation

Take Control of Performance and Margin:

- > Dynamic routing based on cost and quality
- > Real-time traffic analytics
- > ASR, ACD, call volume, and cost reporting
- > Custom rate decks and routing control
- > High-completion outbound options

Replace Multiple Vendors with One Platform:

- > Origination and termination
- > Messaging and toll-free services
- > APIs and programmable services
- > Fraud and compliance tools
- > Hosted billing and back-office platform

Built for Providers Who Want More

MSPs & IT Providers

Add voice, messaging, compliance, and recurring revenue without becoming a carrier.

ITSPs & UCaaS Providers

Power your platform with scalable origination, termination, routing control, and number services.

Contact Centers & High-Volume Platforms

Optimize completion, manage costs, protect against fraud, and support high-volume voice traffic.

Developers & ISVs

Embed voice, messaging, and automation into applications without telecom complexity.

Build smarter. Scale faster. Win bigger.
